Forget the beanbags

Here are the real workplace
trends to steal from tech

Forget the beanbags: Here are 6 workplace trends to steal from tech.

The workplace is changing, and unless you've been living under a rock (or just working from home) you've probably noticed. Fewer cubicles, better perks, Ping-Pong tables ... Since the physical workplace isn't essential any longer, employers are making it more appealing to be there, and easier than ever to collaborate.

Tech companies are pioneers of this trend. They've challenged long-held expectations and defined what the modern workplace looks like. Bean bags aside, their reasoning still stands: The workplace can and should evolve to be a better partner to employees.

But how do you differentiate between a passing fad and lasting feature? This ebook covers six workplace trends we expect to stand the test of time. These features deliver on employee output and enjoyment, add value, and can be customized for any company—no matter how traditional.

The difference between a CMS and a DXP

As the marketing technology stack proliferates, it's crucial to know how each platform supports your needs. Learn the difference between content management systems and digital experience platforms.

How to choose the right CMS

With the right content management system (CMS), your organization will be able to easily deliver amazing customer experiences across all channels. Here's how to find the right one.

Sitecore Experience Platform

A powerful content management system (CMS) is just the start. Sitecore® Experience Platform™ (XP) also combines customer data, analytics, and marketing automation capabilities to nurture customers throughout their journey with personalized content in real-time, across any channel.

Procter & Gamble

With Sitecore, P&G transforms its massive digital marketing presence worldwide through an agile global platform that lowers cost, speeds time to market, and delivers a better consumer experience.

You can:

- Confirm your page is ranking for target terms, tweak as needed
- See what related terms content is ranking for and better optimize for those
- Give your content legs: Promote it, share it, make a report an infographic, a blog post variant a guest post elsewhere ...
- Test different calls to action, button placements, etc.
- Update older but well-performing pages that start to dip in rankings
- Define and align on when it's OK to let things die
